

Solderless Breadboard

EXP-300E, 550 Tie-Points

Description:

The Global Specialties brand of solderless breadboarding systems continue to be the industry standard for reliability, durability, and versatility. They are molded in a high impact plastic to withstand use with high temperature applications. With phosphor bronze contacts and a heavy mylar backing, the possibility of short circuits is completely eliminated.

Features:

- Phosphor bronze contacts
- Heavy mylar backing
- 3-Year warranty
