

CT3382A

Precision RF Attenuator Kit

Product Overview

Cal Test Electronics is pleased to introduce its new Precision 50Ω BNC Attenuator Kit, [CT3382A](#). The kit contains six instrument grade, male to female, 50Ω coaxial fixed attenuators useful in a wide variety of applications including impedance matching and level control.

With symmetrical Pi-pad attenuator design, these attenuators are ideal for use between two equal impedances ($Z_S = Z_L$) to reduce signal levels, and for matching of unequal source and load impedances ($Z_S \neq Z_L$). Whichever application you choose, high performance is assured with a VSWR of 1.25:1.

The kit contains six attenuators from the [CT3369A](#) Series included in a protective foam-lined wooden case. Attenuation values are: 3dB, 6dB, 8db, 10dB, 14dB, and 20dB.

Model	Features
CT3382A Precision RF Attenuator Kit, BNC M-F, 50Ω, 4GHZ	• Excellent VSWR of 1.25:1 • 2 W Average power level • 250 W Peak power level • 4 GHz range • Made from nickel plated brass with gold plated center contacts • RoHS 2 Compliant • MSRP \$399.00

New Products Review

Listed below are the latest product releases. Click on the link below to view the product pages and review detailed product information as well as technical resources.

- [CT4299](#), Fused Probe, 500mA with Locking Tip Cover
- [CT4231](#), 4mm Sheathed Binding Post, Panel Mount
- [CT3800](#), Series of Magnetic Connectors
- [CT4140A](#), 4mm Inline Fuse Adapter, 1 kV CAT IV, with ID rings
- [CT2142](#), 2mm Do-It-Yourself stacking banana plug with solder wire connection
- [CT2143](#), 2 mm Plug to Plug wire for easy connections

- [CT2387](#), Spring Tip Miniature Probe with 2 mm jack
- [CT3075](#), 2 mm Safety Plug with a stud

About Cal Test Electronics

Since 1995, Cal Test Electronics has been serving the electronic and electrical markets with an extensive line of quality test accessories and a commitment to total customer service. We evolved for the specific purpose of providing customers with products they need to get their tasks completed. Our mission is to provide you with both a quality product and 30 years of expert knowledge so that you can remain focused on your goal. Our job is to make your testing life easier. If you are in the electronic, electrical, maintenance or process control industries, we offer the most comprehensive lines of test accessories. With over 3,000 items in 7 product categories, there is almost no test accessory challenge Cal Test cannot meet.
