

CT4043-200

High Current Test Leads w/ Spade Lugs

Product Overview

Cal Test Electronics is pleased to introduce new High Current Test Leads, model [CT4043-200](#). This assembly is great for your power supply, load, or battery analyzer test connections. On each end there are heavy duty spade connectors with 8 mm openings to lock tight onto your binding posts or terminals. As these test leads are capable of carrying up to 60 A through their 2 meter length, your concerns over the test lead capacity when making high current measurements are now answered.

Keeping the black and red leads bound together is a flame retardant mesh sleeve. On both

sides of the sleeve there is at least 10 cm of unbound black and red cable giving you freedom from even the most awkward connections.

No stiff cable here. The **CT4043-200** is made of highly flexible silicone jacketed lead wires. The conductors are 19 strands of copper wire contributing to the very flexible and supple feel.

Model	Features
CT4043-200 High Current Test Leads, 60A, 200 cm /w Spade Lugs	• Current rating: 60 A Max • Molded housing material: PVC • Lead wire: Silicone jacket over 8 AWG, 19/0.12mm tinned annealed copper • Spade connector: Tinned copper, 8.4 mm opening, 1.8 mm thick • UL 94 V-2 rated, flame retardant, mesh braided sleeve • RoHS 2 Compliant • MSRP \$85.00

New Products Review

Listed below are the latest product releases. Click on the link below to view the product pages

and review detailed product information as well as technical resources.

- [High Voltage Series Sheathed Jacks](#), 5kV, 4mm Sheathed Banana Jack, Panel Mount
- [High Voltage Series Banana Plug Test Leads](#), 5kV, 4mm Long Reach Banana Plug Test Leads, PVC Jacket
- [CT3021](#), 5kV, Fully Insulated Large Alligator Clip with 4mm Sheathed Banana Jack
- [CT3887](#), CAT IV Sheathed Banana Jack, Press Fit, 2mm Pin, 1kV
- [CT4299](#), Fused Probe, 500mA with Locking Tip Cover
- [CT4231](#), 4mm Sheathed Binding Post, Panel Mount
- [CT4140A](#), 4mm Inline Fuse Adapter, 1 kV CAT IV, with ID rings

About Cal Test Electronics

Since 1995, Cal Test Electronics has been serving the electronic and electrical markets with an extensive line of quality test accessories and a commitment to total customer service. We evolved for the specific purpose of providing customers with products they need to get their tasks completed. Our mission is to provide you with both a quality product and 30 years of expert knowledge so that you can remain focused on your goal. Our job is to make your testing life easier. If you are in the electronic, electrical, maintenance or process control industries, we offer the most comprehensive lines of test accessories. With over 3,000 items in 7 product categories, there is almost no test accessory challenge Cal Test cannot meet.
