

CT4401

8 kV Hook Clips with 4mm Sheathed Banana Jack

Product Overview

Cal Test Electronics' CT4401 is a High Voltage Hook Clip. Its robust size provides that extra level of protection needed in high voltage applications. With its extra clearance and creep distances, it can operate up to 8 kV when used in non-category environments.^(a) In addition, these clips meet the rigorous standards of IEC 61010-031, rated at 1,000 V CAT III, 5 A.^(b) The [CT4401](#) connects to 4 mm sheathed banana plug leads (sold separately) for use with DMMs, differential probes, or other needed test equipment.

Its plunger style actuation facilitates quick connections while allowing for minimal exposed contacts, thus reducing unintentional short circuits. Ribbed handles provide for a sure grip. The hook can fit on conductors up to 2.5 mm in diameter.

Made of a rugged and durable fiber filled Nylon, these clips will give many years of reliable use. The clips are sold individually, or in a pair of black and red as [CT4402](#).

- a. Never hold or touch equipment while connected to live voltages.
- b. Must be used in conjunction with other similarly rated products.

Model	Features
CT4401 8kV Hook Clip with 4 mm Sheathed Banana Jack	- Specified up to 8 kV in non-CAT rated environments - IEC 61010-031 rated to 1,000 V CAT III, 5 A - Rugged and durable fiber filled Nylon
CT4402	

8kV Hook Clip with 4 mm Sheathed Banana Jack, Black and Red Pair

- Ribbed handles for a sure grip
- Connects to 4 mm sheathed banana plugs
- CE listed
- RoHS 2 Compliant
- CT4401 MSRP **\$18.00**
- CT4402 MSRP **\$36.00**

New Products Review

Listed below are the latest product releases. Click on the link below to view the product pages and review detailed product information as well as technical resources.

- [CT4043-200](#), High Current Test Leads, 60A, 200cm w/ Spade Lugs
- [High Voltage Series Sheathed Jacks](#), 5kV, 4mm Sheathed Banana Jack, Panel Mount
- [High Voltage Series Banana Plug Test Leads](#), 5kV, 4mm Long Reach Banana Plug Test Leads, PVC Jacket
- [CT3021](#), 5kV, Fully Insulated Large Alligator Clip with 4mm Sheathed Banana Jack
- [CT3887](#), CAT IV Sheathed Banana Jack, Press Fit, 2mm Pin, 1kV
- [CT4299](#), Fused Probe, 500mA with Locking Tip Cover

- [CT4231](#), 4mm Sheathed Binding Post, Panel Mount

About Cal Test Electronics

Since 1995, Cal Test Electronics has been serving the electronic and electrical markets with an extensive line of quality test accessories and a commitment to total customer service. We evolved for the specific purpose of providing customers with products they need to get their tasks completed. Our mission is to provide you with both a quality product and 30 years of expert knowledge so that you can remain focused on your goal. Our job is to make your testing life easier. If you are in the electronic, electrical, maintenance or process control industries, we offer the most comprehensive lines of test accessories. With over 3,000 items in 7 product categories, there is almost no test accessory challenge Cal Test cannot meet.
